ANNEX IV NetQues NQ SLT competences by EQF

As discussed in the NetQues project final chapter (Chapter 8) the project's work package team 3 responsible for analysing the data gathered suggested possible allocations of EQF levels to competences descriptors. It is acknowledged that allocation of the more complex interactions of skills, knowledge and competences to these categories can be in some instances quite arbitrary and more debate is required on such issues. A further study might well wish to take up this point and debate it further. The preliminary results are therefore presented here.

Table: Possible allocations of EQF levels to expected competences of newly qualified SLTs
